

Please send or fax to your librarian

LIBRARY RECOMMENDATION FORM

To: _____

Name of librarian or departmental library representative

This is a **RECOMMENDATION** for having our library subscribe to the **European Geosciences Union** journal titled;

ATMOSPHERIC CHEMISTRY AND PHYSICS

Please include this journal title in the next serials review meeting with my recommendation.
Thank you!

(name, department & title of person recommending the journal for the library collection)

The major uses of this title for our Library would be:

REFERENCE: I need access to this journal's new research or clinical practice articles as I become aware of them through citations in databases and related journals and books.

PREDICTED BENEFIT FOR LIBRARY: My evaluation of this journal's contents and direction is very high, and it is likely to be both cited and/or indexed/abstracted heavily. Adding this journal will add to the library's success in fulfilling the information needs of our institution.

PUBLICATION OUTLET: My current research requires a publications outlet in this exact area. I need this journal to keep up to date with its editorial directions and scope.

STUDENT READINGS: I intend to search the contents of new issues regularly for adding to my student's reading list.

ONLINE VERSION: Is available FREE.

OTHER: _____

The recommended title is published by

European Geosciences Union
Max Planck Str. 13
