

ACP Special Issue

"Atmospheric implications of the volcanic eruptions of Eyjafjallajökull, Iceland 2010"

The special issue is dedicated to scientific studies of the volcanic eruption of Eyjafjallajökull, the evolution and properties of the resulting plume, and their consequences. The topics range from the characterization of volcanic emissions to the description and forecast of plume dynamics and transport; physical and chemical observations encompassing satellite, aircraft, ground-based remote sensing and in-situ data collection; and the atmospheric implications of volcanic eruptions.

Authors can submit their contributions any time by using the [online registration](#) form on the ACP website.

Manuscript preparations and peer-review are conducted according to the usual ACP guidelines.

The last deadline for submission is 31 May 2012, and extendable if necessary.

During the registration process it is important that the correct special issue is chosen. The editor call is based on a "First Come - First Served" basis.
